

What are you doing to Promote Self-determination and Advocacy?

We want to hear from you!

The Division of DD has contracted with the University of Missouri Kansas City-Institute for Human Development (UMKC-IHD) to find out what great things providers, TCM's, and county boards are doing to promote self-determination and self-advocacy throughout the state of Missouri. We want to learn about and share successful efforts so they can be used around the state and help as many individuals as possible experience the benefits of living a self-determined life. To accomplish this goal we developed a short survey with input from People First, the Consumer Advisory Leadership Team at the University of Missouri Kansas City Institute for Human Development, representatives from the Missouri Association of County Developmental Disabilities Services, and the Division of Developmental Disabilities Regional Advocacy Specialists.

The plan is to distribute an online survey to TCM and service agencies statewide in January, 2018. UMKC-IHD will compile the results and prepare a report that outlines the self-determination and advocacy activities throughout Missouri.
